OF ALL TIMES, NOW IS THE TIME to Plant Nursery Stock

MAKE YOUR HOME MORE FRUITFUL AND BEAUTIFUL BY PLANTING
WELCH-GROWN TREES AND PLANTS

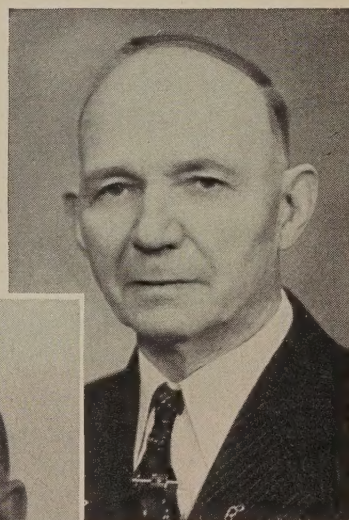

Dear Customers and Friends:

ONCE more we present to you our annual catalog for 1946. We still have an abundance of most stock for your home plantings. We picture some in their natural size and color and we describe them accurately, so that in the quiet of your home, you and your family can select exactly what you need—how much waste land might be planted to vines and fruits; what ground has yet reached the limits of its possibilities. We get energy from the air we breathe, the water we drink, the fruit we eat and the sunshine we absorb. This certainly helps to stave off premature old age and self-caused ill health.

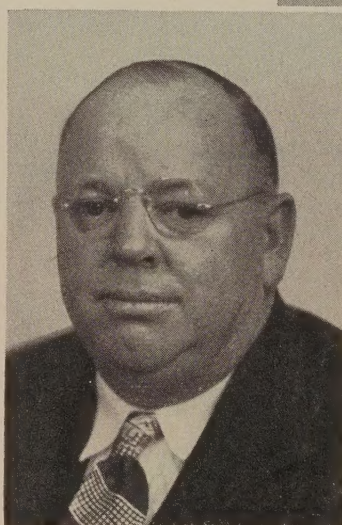

For sixty-four years we have been growing nursery stock, testing and fruiting thousands of varieties and discarding all but the very best. We do not try to sell you any variety that we, ourselves, would not plant. We have built up a good business on the confidence of our customers and many of these customers have become financially independent growing fruits from our stock. The greatest cost to the customer is in preparing his land and caring for his trees after they are planted. So you cannot afford to waste your money on poor stock. Our stock is reliable and you take no risk in ordering from us. If you have a speculative hankering, try one of the most interesting speculations—planting fruit trees. We honestly believe that your dollars will bring you greater returns than any other investment that we know of. Welch's trees will give you your money's worth.

You will lose no money by ordering from this catalog and your order will be appreciated. Get your order in early so that the stock may be reserved for you and sent to you at the proper planting time. Nature's time for getting things started is early **spring**, so co-operate with Nature. This means success in planting. We have many other varieties of stock not listed here and we will be glad to furnish prices when requested. We invite correspondence and will be pleased to quote you prices on large plantings. Come and see us when you can. We are located in north Shenandoah, one block northwest of the Wabash Depot. Phone 112.

Our Guarantee

All goods are guaranteed to reach you in good live growing condition. Mistakes, if made, will be promptly adjusted. Accept the shipment and notify us at once, should there be any errors, and the carrier as well, should there be any damaged stock. This guarantee is not good unless above requirements are complied with. Nursery stock is just the same as human beings—it breathes, drinks and feeds, and is subject to disease. With proper planting and proper care, we know that our stock will grow and do well for you.

PLANTS AND TREES BY PARCEL POST

We strongly urge the advantage of our Parcel Post system for handling small quantities and the smaller size plants and trees.

We can send by Parcel Post, Grape vines, Raspberry and Blackberry plants in lots of 100 or less. Currants and Gooseberries, both one- and two-year-old, in lots of 25 or less. One-year-old fruits and ornamental trees and shrubs, Roses, also bulbs, Peonies, Iris, and perennial plants.

The two larger grades of trees cannot be sent by Parcel Post. However, we call attention to the fact that express rates on nursery stock have been reduced about 25 per cent, which will be quite a saving to you on the larger size trees.

We prepay the postage on all Parcel Post shipments, and your plants are laid right down at your door.

GUARANTEE OF GENUINENESS. If any nursery stock, etc., proves untrue to description under which it is sold, we hold ourselves in readiness, on proper proof, to replace all such nursery stock, etc., that proves otherwise or refund the amount paid, but shall in no case be liable for any sum greater than the amount originally received for said nursery stock.

STATE CERTIFIED STOCK. Certificate of Nursery Inspection, No. 153, furnished with every shipment.

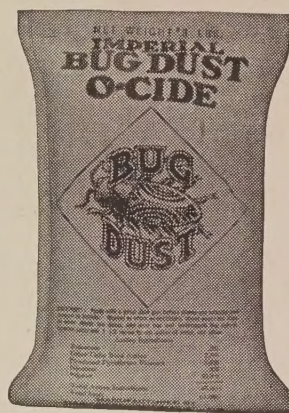

PERSONAL CHECKS ACCEPTED. Iowa customers only, please add 2 per cent sales tax.

Welch's PLUMS

One of the best and most healthful fruits that can be planted is the Plum. It contains calcium, iron and other elements often lacking in the ordinary diet.

PRICES:

- 4 to 6 ft., 11/16 in., \$1.15 each;
per 5, \$1.00 each, not prepaid.
- 3 to 4 ft., 7/16 in., 90c each;
per 5, 85c each, prepaid.

The list that we offer are the choicest varieties for the home and commercial planting.

WANETA. (Hansen.) July. The fruit is of immense size, deep red; skin very thin, and the flavor is delicious. Prof. Hansen's best Plum, and in fact, one of the greatest of all Plums.

UNDERWOOD. This is the earliest of the large new Plums. Ripens from about August 1st to 15th, and attains a size of 1 3/4 inches. The tree is one of the strongest growers of all these new Plums and gets to be very large, furnishing a large bearing surface to produce wonderful crops of beautiful fruit. Fruit is red, firm, juicy flesh, very small pit; freestone. Splendid quality.

TERRY. (Native.) August. Best of the natives. Fruit very large, and of bright red color. Fine quality. One of the largest and most handsome hardy Plums and deserves extensive planting. Fruit ripens evenly and is a good keeper.

ELLIOTT. (Peach Plum.) A very large, yellow-fleshed, perfect freestone Plum. Very sweet and of fine Peach flavor. Requires only half the usual amount of sugar for canning. Does not rot on the trees. Our orchard bore an immense crop last year, and has never failed. This Plum is in a class by itself. Season early August. Color orange-yellow splashed with red.

APRICOT PLUM. (Hanska Type.) This variety has all the good qualities that a Plum should have, with an apricot flavor. The fruit is excellent for eating from the tree, canning, preserving or jelly. The luscious fruit is reddish blue. Tree strong grower, a 6-year-old tree measuring 30 feet high and 20 feet across. A good shipper. Freestone. Season August.

BURBANK. An abundant yearly bearer. Large, round, dark red fruit. Will succeed in any soil. Perfectly hardy. Ripens from first to middle of August.

SAPA. (Hansen.) July. An extremely early, vigorous bearer. Fruit medium size, glossy black; flesh deep purple, excellent flavor; skin very tender.

MONITOR. Large, bright showy red—another early good native Plum. Sweet and sugary. A heavy bearing variety. Ripens early; a real money maker.

TECUMSEH. One of Dr. Hansen's latest productions. A tall growing tree, vigorous in form, with large leaves. Very hardy North. Large, red color with flesh yellow and a free-stone. One of the heaviest bearing and greatest of early Plums.

3 Oka Sweet Cherry Plum, \$2.00, Postpaid

OKA Sweet Cherry Plum

One of the latest of Prof. Hansen's introductions. Hardy everywhere, will bear the year after planting. Fruit round, deep rich red, of a delicious, sweet taste, and left on the tree, dries into a sweet, prunelike fruit. The tree will bear fruit from the ground up, making it very easy to pick. The branches will be an almost solid mass of fruit, which can remain on the tree until you find time to pick it. Unequaled for jellies and jams. Good cooked or eaten raw; good for the children, pa and ma—makes the most excellent sweet sauce you ever ate. Ripens about July 25th.

American Native Plum Seedlings

2 to 3 ft., 12 for \$1.00, postpaid.

This is one of the trees recommended by the government that you can use in planting for soil erosion and also get an abundance of fruit, which is unexcelled for jellies, butters and jams. They are absolutely hardy, also drought resistant, and will take care of themselves after the second year. They will grow and produce planted either on the hills or bottoms.

ELBERTA. (Freestone.) Fruit large, yellow with red cheeks; flesh yellow, juicy, fine quality. Tree hardy and exceedingly productive. Ripens with the Crawford's Early. Exceptionally large and fine. August.

HALE-HAVEN. (Freestone.) The outstanding characteristics of this new Peach are its extreme hardiness, its early bearing, its rich yellow and red colors, and its shipping qualities.

SOUTH HAVEN. (Freestone.) The great hardy Peach for cold regions; stands 10 degrees colder weather than any other Peach grown. Large, yellow freestone. Large as Elberta and a week earlier on the market.

RED BIRD CLING. The best of all early Peaches. Tree is hardy, vigorous and very productive. Fruit is of good size and very showy appearance, an attractive creamy white, splashed or blushed with red. Welch's GRAPES

There is no more healthful drink than good sweet Grape juice. A drink for the gods and for the humblest laborer toiling in the hot sun; it has found its way in administering to the sick and to the merry-makers; it has become an element of the sacrament and of the celebration. Knowing what real values there are in Grape culture, I like to think that I am building up the health of my customers, when I recommend heavy planting of Grapes. Never hesitate to put faith in a Grape vine, for it will justify that faith if you give it half a chance.

AGAWAM. Bunch large, shouldered; berry large, reddish brown, tender, vinous and of excellent flavor. Very vigorous and productive. Fine, hardy, and one of the best of its class. The most productive of all reds. 2-year, 25c each, prepaid.
